# A durable and sustainable concept

---

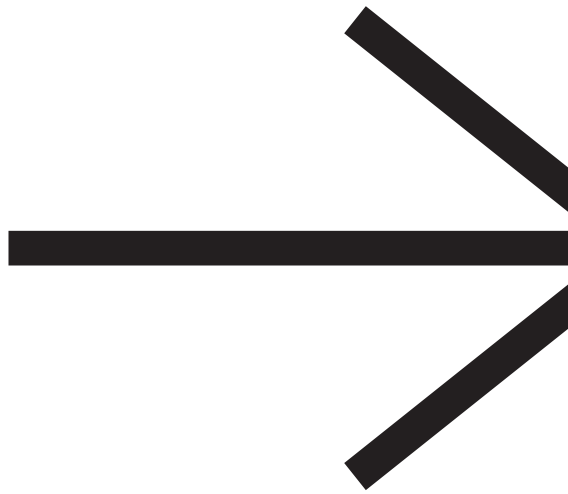

We are able to recycle ceramin and give it a second life, in our own production or in the garden furniture, automotive bumpers or packaging items. Due to the use of green electricity and the participation in CO2 projects, we are completely CO2-neutral when it comes to energy purchases at our Kaisersesch site in 2020! We are constantly aiming for a 100% integrated cycle of using and re-using the accurate selected raw materials by closing the loop in our production process.

Because we care about everyone's good health and wellbeing, and want to assist slowing down the climate change.

# We bring nature home.

---

The Kaisersesch plant is the CLASSEN Group's competence and production site for SPC design & vinyl wall and floor coverings. Our unique technology makes it possible to produce a 100% recyclable concept with the best designs and a perfect quality and finish.

# Concept

## How does nature come home?

---

Being creative is sometimes hard work in our own workshop, sanding, painting, carbonizing, until the desired result is reached.

Due to our unique digital printing technology, we are able to create 100% authentic designs with a huge variety of planks up until 24 different planks per décor.

We collect ideas everywhere in the world's beautiful nature and we bring them to your home.

Nicole Knospe,  
**Head of Design CLASSEN**

"Design matters. We want to differentiate and develop the most beautiful products, on design, texture and finish. Our in-house design centre is the creative soul of our company. A young motivated team is working on a permanent basis to be always ahead of the market trends, preparing the design solutions for tomorrow."

# Getting ready „Four Tomorrow“

---

Everyone at CLASSEN is highly aware that our decisions and projects focus on the wellbeing of the end consumer. All our amazing technology, our inexhaustible design options, our unconditional respect for our planet and the harmonious bond of our staff and people have all only one common objective: getting ready for tomorrow...

Because we live today, caring for tomorrow.

# FOUR TOMORROW

## Design

Design matters. We want to differentiate and develop the most beautiful products, on design, texture and finish. Our in-house design centre is the creative soul of our company. Preparing the design solutions for tomorrow.

---

## Technology

Since we became a manufacturer, we always focused on the best machinery, on efficiency and on maximum output. The business model of the CLASSEN Groups is based on permanent investing in capacity and unique production concepts.

---

## Planet

Whether laminate flooring or design& vinyl wall and flooring, creating durable products are a fundamental part of our company vision. Sustainable forestry management, generating our own energy, emission-low products, 100% recyclable, close the loop production processes...

---

## People

Our people are the engine of our success! From the factory engineers, to the administrative teams. From our sales force to our machine operators, at CLASSEN we strive for a homogeneous team spirit with one common goal: being the best in what we do, to create and deliver. Every day again.

# Quality for your home

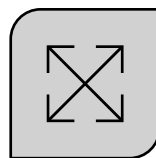

---

All our products are pure quality made in Germany respecting the highest production standards

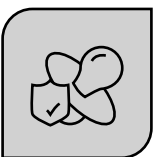

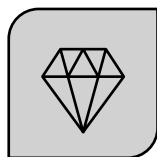

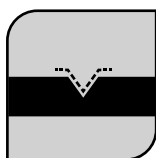

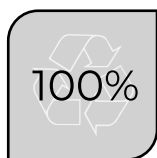

The Universe collection is absolute top of the League, the entire collection is anti-slip, includes a heavy traffic AC6 top-layer and has the best score in dimensional stability. Furthermore the ceramin boards are really lightweight but still very rigid.

We offer beautiful wood designs and a very exclusive & Unique size for our robust tiles effect range: 40x80 cm, a real blast!

**The Collections**

The background is a complex marbled pattern with a wood grain texture. It features a mix of light beige, tan, and brown tones, with darker brown veins and spots that resemble natural wood grain. The overall effect is organic and textured.

WOOD

Surrounded by the Dead Sea and the Gulf of Aqaba, the “rose-red city half as old as time” is a real wonder of the world. It is for sure the most valuable treasure in Jordan, but as well a big inspiration for the CLASSEN design team.

# megaloc makes the difference!

---

## 1 Position

Simply click the long side of the plank in the previous row and push down the plank. It is a child's play.

## 2 Lock and Finish

A simple pressure of the hand locks the short side of the plank. Where you hear the "click", the connection is fixed.
